## Cybil Consults: Your Professional Partner For Designing Of Wet And Dry Fire Systems

Cybil Consults welcomes you as your dedicated and trusted partner. With a focus on excellence, we provide services of fire systems designing for class 2-9 buildings as per NCC-2022 such as Automatic Fire Sprinklers, Hydrants & Fire Hoose Reels, Fire Detection and Occupant Warning Systems, Selection and Distribution of Fire Extinguishers.

We are accredited and qualified to design fire systems, for new and fitout projects, for NSW, ACT and Western Australia to generated plans and specifications in compliance with state's Acts and Regulations. We guarantee that our plans and specifications meet the performance requirements of NCC-2022 and any statutory regulations.

Count on us for personalized solutions of Fire Systems Designing with peace of mind.

### We! Proposing Passive Fire Systems.

We're proud to lead in solutions to passive fire protection services. For passive fire protection services, we use the Australian made products such as Promat and Trafalgar.

Cybil Consults offers comprehensive solutions of fire protection services designed to protect your property and occupants. We ensure that our solutions comply with NCC-2022 performance requirement. We prefer to meet the performance requirements with DTS solutions for service penetrations. When it comes to seal the control joints or service penetrations with fire collars, board, fire sealant or wraps, it is ensured that our proposed and installed passive fire system are approved as per AS 1530.4 and treated as per AS 4072.1

We are also here to answers any queries about fire protection services that you may have. So, if there is something that you are unsure about Fire Protection; Passive and Active Systems, please do not hesitate to get in touch. We hope to hear from you soon.
